REMARKS

The Office Action of June 28, 2006 has been carefully considered.

Objection has been raised to the specification, and an appropriate correction has been made.

Claims 16 and 17 have been identified as being allowable over the art.

In particular, the Office Action states that "the prior art of record neither teaches nor suggests a white light emitting device having all the limitations as claimed in claim 16 and particularly the limitation comprising a projection formed on the arm of the cover member the projection being engaged with an engaging hole formed in the groove of the case body."

In accordance with this statement, claim 16 has been amended to incorporate the recitations of claim 4 and the recitations of claim 15, claim 16 thus reciting a projection formed on the arm of the cover member, the projection being engaged with an engaging hole formed in the groove of the case body. As the limitations of claim 13 were not discussed in the reasons for the indication of allowable subject matter, claim 13 remains in the application as dependent claim, depending from claim 16.

Applicants submit that all claims in the application are allowable over the art of record, and withdrawal of the rejections of record is requested.

In view of the foregoing amendments and remarks, Applicants submit that the present application is now in condition for allowance. An early allowance of the application with amended claims is earnestly solicited.

Respectfully submitted,

Ira J. Schultz
